

Space

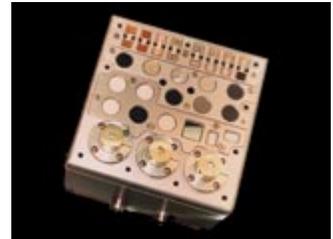

Electronics and sensors for space

National Polar-Orbiting Environmental Satellite System

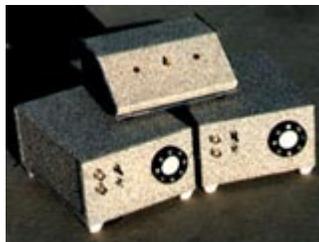

Tropospheric Emission Spectrometer TES

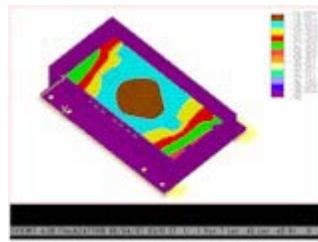

Space Materials Experiment Element SME-M1A

Systems

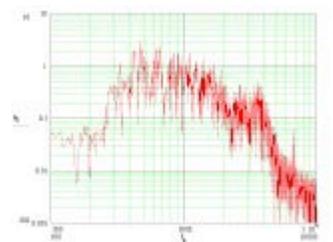

Electro-optical systems design

Infrared Sensors and RF Communications Network

Thermal and Mechanical Modeling for Reliability

Acoustic Signature Analysis for Aircraft Discrimination

Power

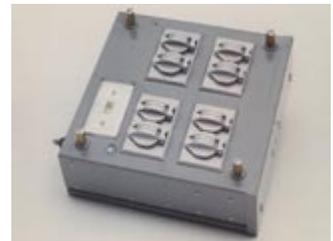

Military power and industrial controls

PAC-216/U Production for SINGARS / USMC

Thermoelectric Controller Developed for OEM Product

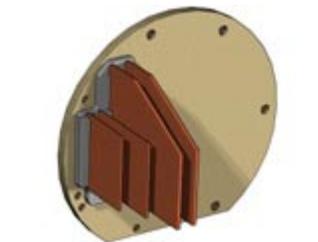

Multiple Outlet, Programmable Power Sequencer

Weapons

Unique weapons systems elements

Airmine Weapon System Development and Test

Electronics for Advanced Interceptor Technology

Infrared Targeting Sensors Production Program
